

STUDENT MARKSHEET GENERATOR

ABSTRACT

Keeping the Student Academic records to simplify the work of faculty members of a particular organization, the Marksheet Generator is one of the software which mainly used for generating marksheets for students. It consists of two logins: Teacher login and Student login.

The project is designed in Java. This proposal aims at developing and designing a system by providing a much simpler, easy to understand interface to handle student marks scored by a student in examination.

The subject teacher will enter the marks using teacher login whereas software will generate the marksheet by integrating all the marks inserted by teachers of different subjects, and also calculate the percentage based on the marks obtained by the student.

The MARKSHEET GENERATOR Management can be used in colleges by students to view their Results anytime using Student login. The proposed system

accesses the students marks from database of different subjects and generates the marksheet.

PROBLEM DEFINITION

MARKSHEET GENERATOR is a program that enables a computer to perform a specific task, as opposed to the physical components of the system (hardware). ... MARKSHEET GENERATOR has to be "loaded" into the computer's storage (such as a hard drive, memory, or RAM). Once the software is loaded, the teachers can be able to insert marks conveniently of respective student of particular subject and software can generate marksheet easily.

A screenshot of a Java Swing window titled "Student Login". The window has a standard title bar with minimize, maximize, and close buttons. The main content area is light gray and contains the following elements:

- A label "Credentials:" centered at the top.
- A label "UserID:" followed by a text input field.
- A label "Password:" followed by a text input field.
- Two buttons at the bottom: "Gener..." (likely "Generate") and "Reset".

A screenshot of a Java Swing window titled "MARKSHEET". The window has a standard title bar with minimize, maximize, and close buttons. The main content area is light gray and displays the following information:

- Student details: *Name: Bob* and *ID: 12*.
- Subject marks:

Java:	65
DS:	87
Maths:	65
Total:	217
Percentage:	72
- An "OK" button at the bottom.

CONCLUSION : Hence we successfully design student marksheet generator.
